

ANGELO SANTIAGO

**Software Dev / Data engineering / AI
Automation**

Professional Summary

Experienced Software Developer with 3 years of professional experience, specializing in AI-powered automation and data engineering solutions. I combine strong software engineering fundamentals with cutting-edge AI tools and data processing technologies to build applications that drive business efficiency. My expertise spans full-stack development, workflow automation, AI-enhanced development practices, and scalable data pipeline architecture using Claude, Codex, and OpenCode. This comprehensive focus ensures clients receive robust, scalable software solutions that deliver 40-60% faster development cycles while maintaining exceptional quality and reducing operational costs.

Key Achievements & Business Impact

- Development Acceleration: Achieved 40-60% faster delivery cycles through AI-enhanced development
- Cost Reduction: Reduced operational costs by 30-40% through intelligent automation
- Productivity Gains: Delivered 25%+ productivity improvements through workflow optimization
- Scalability: Designed and deployed scalable cloud solutions handling business growth seamlessly
- Quality Assurance: Maintained exceptional code quality while accelerating development timelines

EXPERIENCE

Software Developer | Expert Solution Outsourcing |
2022 - 2025

- Developed and deployed scalable web applications using React, Next.js, Node.js, and TypeScript
- Implemented AI-powered automation solutions using Zapier, N8N, and Google Cloud Functions
- Designed and maintained data pipelines and cloud architecture for optimal performance
- Leveraged AI development tools (Claude, OpenCode) to accelerate delivery by 40-60%
- Reduced operational costs by 30-40% through intelligent automation implementations
- Achieved 25%+ productivity gains through workflow optimization and automation

EDUCATION

Don Honorion Ventura Technological
University

Bachelor of Information Technology
